

Eran Helvitz

B.S. Computer Science - Software engineer | AI Developer | Backend Engineer
+972-504977265 | 13eran@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Seeking a full-time Software Engineer / AI Developer position.

Skills

Languages: Python, C++, Java, TypeScript, SQL, React

AI & Automation: AI Agent development, Prompt engineering, OpenAI API, ChatGPT, LangChain, automation pipelines, n8n

Backend: FastAPI, Node.js, RESTful APIs, SQLAlchemy

Databases: PostgreSQL, familiarity with NoSQL

DevOps: Docker, Git/GitHub, CI/CD (GitHub Actions)

Cloud & Platforms: Vercel, Fly.io, Neon (Postgres), familiarity with Azure AI & Copilot Studio

Concepts: OOP, Algorithms, Data Structures, Real-time Systems, Multithreading, AI Integration.

Summary

B.Sc. in **Computer Science** and passionate **Software Engineer** with strong skills in **Python, React, SQL**, and modern development tools. Experienced in **building web applications** and **backend systems**, with growing focus on **AI development and integration**. Actively leveraging AI tools (such as **Cursor, ChatGPT**, and others) in daily work to accelerate learning, improve code quality, and explore new technologies. **Quick learner, problem solver**, and highly motivated to contribute to innovative projects in software and AI domains.

Development Projects

- **Personal AI Productivity Agent (Python, FastAPI, Telegram API, OpenAI API)**
A local productivity assistant that connects to OpenAI's API and automates daily workflows such as task creation, reminders, and focus tracking. Built to explore real-world AI agent behavior, natural language processing, and secure API integration.
- **PromptFlow (Python + Typer + SQLite)**
A command-line framework for designing, improving, and versioning AI prompts. Enables structured prompt management and automation for model testing and optimization — developed to help engineers build smarter LLM-based tools.
- **ArtistHub (Python + FastAPI + React)**
A full-stack web platform for managing artists, bookings, and analytics dashboards. Includes secure authentication (OAuth2), calendar integration, and a real-time chat system. Designed to streamline communication and data management for creative professionals.

Work History

2024 - Present	Freelance / Independent Software Developer Design and develop full-stack and AI-based systems for personal and client projects. Work includes backend API development, automation workflows, cloud deployment, and AI integrations using Python, FastAPI, and OpenAI APIs.
2023 - 2025	Military reserve
2020 - 2022	Rossa Wine Truck — Owner Managed all aspects of a growing business, from operations and logistics to digital infrastructure. Developed tools to track sales and optimize workflows.
2017 - 2020	Production operation manager for "The big brother show" Led production logistics and system coordination for a large-scale live TV show, requiring precision, technical awareness, and real-time problem solving.
